

## 04 Case Update/Edit Process

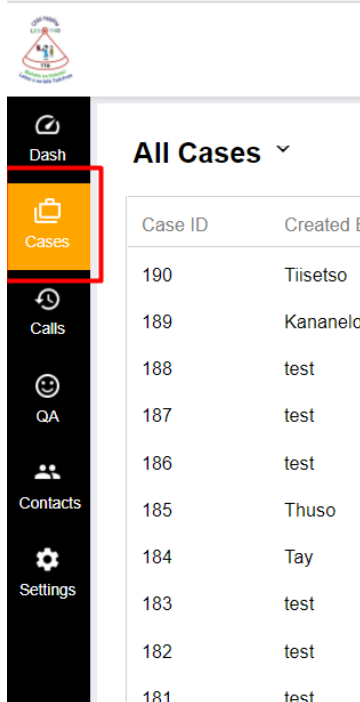

User Acceptance Testing (UAT) is **the final stage of any software development life cycle**. This is when actual users test the software to see if it is able to carry out the required tasks it was designed to address in real-world situations.

In this situation, we have identified the Case Update process as critical to the success of the project.

When a case is ongoing any new developments can be updated on the case provided that the case details are known.

to update a case.

- Click the briefcase button on the left side menu as seen below. You will see a list of cases. as seen on the right.

Using the filter button at the top

- Key in the case ID of the case you are searching for. and click apply

Escalated To:
