03 Centos OS installation Guidelines

Cento8 ISO image link
http://centos.mirror.liquidtelecom.com/8.4.2105/isos/x86_64/CentOS-8.4.2105-x86_64-boot.iso

Rufus 3 Executable link
https://github.com/pbatard/rufus/releases/download/v3.17/rufus-3.17p.exe

Rufus is used to create a bootable disk for the CentOS.

1. Download CentOS and Rufus from the links provided
2. Insert your USB drive on the computer
3. Open Rufus, Under the "Boot Selection" click select and trace the CentOS image
4. Leave everything else as they are and click start. The setup will show progress, once done click on close
5. Remove the USB drive, it's ready for use on the server
